Over at Denton the other day

the cornerstone was laid on a modern, fire-proof Masonic temple which

is in course of construction. The building is to be three stories high and will present a fine appearence

when completed. Denton is not a

great deal larger town than Vernon. and doubtless Vernon Masons are as able to erect a new temple. A move in that direction was recently

started here, but little has been done after the first few thousand dollars

were subscribed to the building

fund. L. G. Hawkins, a prominent local Mason, said the other day that

he is extremely anxious to see the

new temple project pushed. He is in favor of a site on Fannin street, suggesting the sale of the present

Important Announcement

Miss Willie Dooley, cashier of this office, is a duly authorized representative of the company and when she tells you that your note will be extended another 30, 60 or 90 days and gives you a letter to that effect you need worry no more over the matter until she writes you another letter telling you that the note is again due. If you happen to call at the office and I am not in she can wait on you. That is her business, while most of my time is taken up in selling another life insurance policy that keeps the wolf away from the door if the "old man" passes out. If you want some more insurance call me, I'll be

Mr. W. B. Smith knows how to write all kinds of fire insurance, automobile insurance and the general lines.. If you want any of this kind of insurance call him he'll be there. It is not necessary for you to see me about this form of insurance because it is his business to keep posted on the new forms that are necessary to keep your property fully protected. Mr. Smith has no side lines. He reads the different changes that are frequently made on fire insurance policies and is fully preared to give you expert information along this line.

My business is to write the business. You know I have the life insurance ready, but it becomes necessary for me to call on you and call the matter to your attention. Nobody means to neglect carrying a sufficient amount of life insurance for the protection of their business credit and family-It is just simply not your business to think about it-it is my business to call it to your attention in the same old way that I have been doing for eight years.

Thanks for your attention,

Most poeple are honest. Most people are willing to pay their just taxes, but the average man soon tires of receiving notices to appear and explain his income taxes that were supposed to have been adjusted two or three years before. The trouble with the Federal tax schedules at the present is that nobody can figure with certainty what they actually mean. It is rare for two auditors to figure the same report

So when Congress comes to con sider the income tax laws at the next session, it is to be hoped that an understandable, workable set of rules and regulations can be worked out in order that any honest man of ordinary intelligence can work out his return and make a settlement, without being harassed with collectors and auditors for years afterward. This could be done if Congressmen and Senators could ever get th eidea that a man is not necessarily a crook simply because he pays an nicome tax.

Buick Performance steps further ahead in World Leadership

The Valve-in-Head engine in the Better Buick Master models delivers more than 75 horsepower! Extra power has been added to the extra power always a feature of Buick's famous engine.

Even drivers of previous Buicks will be amazed at the performance the Better Buick now places at their command. The higher efficiency of the engine in the Better Buick includes the same economical consumption of gasoline and oil that has distinguished all past Buicks.

And the Better Buick now leads the world in protection for engine and driving units. Three new seals have been added to Buick's famous Sealed Chassis. An air cleaner, a gasoline filter, and an oil filter, now insure clean air, oil and gasoline

Drive one of the Better Buicks. Know how much the new 75 horsepower Standard of Performance adds to the pleasure of Buick ownership.

You never again will be satisfied with the power and performance of the ordinary motor car.

We do not believe in mis-statements no an indulgence in pessimism—but we do think we owe it to our customers and the people of Wilbarger County toplainly state facts regarding the coal situation. As all know-there has been a disturbed situation in the indutry—between miners and operators, with the result that already there has developed a series of strikes with a possibility of spreading to other fields where we get our sipply. For that reason it is important that consumers take steps now to protect their families during the cold months that are to come.

AND THE BEAD TO BECOME BALD

Dandruff is a germ disease and known as a scaly form of Tetter or Eczema. This microbe lives on the oily substance of the skin and robs the hair of its proper nourishment, causing it to fall out and the head to become bald. Get rid of dandruff before it is too late. Wash the scalp well with hot water and soap, dry with a soft towel and apply Hooper's Tetter-Rem (Don't Scratch), rubbing it in well. Then steam the head with hot towels. Ask your barber for Hooper's Tetter-Rem scalp treatments. Hooper's Tetter-Rem is positively guaranteed for all scalp and skir diseases. Two sizes, 75c and \$1.50. Sold and guaranteed by

Important Announcement

Miss Willie Dooley, cashier of this office, is a duly authorized representative of the company and when she tells you that your note will be extended another 30, 60 or 90 days and gives you a letter to that effect you need worry no more over the matter until she writes you another letter tellng you that the note is again due. If you happen to call at the office and I am not in she can wait on you. That is her business, while most of my time is taken up in selling another life insurance policy that keeps the wolf away from the door if the "old man" passes out. If you want some more insurance call me, I'll be there.

Mr. W. B. Smith knows how to write all kinds of fire insurance, automobile insurance and the general lines.. If you want any of this kind of insurance call him he'll be there. It is not necessary for you to see me about this form of insurance because it is his business to keep posted on the new forms that are necessary to keep your property fully protected. Mr. Smith has no side lines. He reads the different changes that are frequently made on fire insurance policies and is fully preared to give you expert information along this line.

My business is to write the business. You know I have the life insurance ready, but it becomes necessary for me to call on you and call the matter to your attention. Nobody means to neglect carrying a sufficient amount of life insurance for the protection of their business credit and family-It is just simply not your business to think about it-it is my business to call it to your attention in the same old way that I have been doing for eight years.

Thanks for your attention,

next Congress to reduce income, inheritance and excess profits taxes. fight will degenerate into a party row, just as the last effort to amend the tax schedule did. It may be expected that the customary amount of little talk will be engaged in by cheap politicians about looking after the interest of the little taxpayer.

A trouble with most of us is that we harbour the notion that prosperity can be legislated by raising the taxes on the rich and lowering ity is not to be attained by any such whether a certain person cut the process. A great deal of capital has been driven out of the productive industry into tax-exempt securities because of the stupid provisions of some of our income tax legislation.

A Vernon business man has only recently gone through a three-year controversy with the Government over levies made for alleged under payment of income taxes. The to Vernon and he would say the firm owed \$3,000 back taxes. A recheck would be ordered and the amount would be changed, sometimes lowered and some times raised. Finally after three years of checking, and rechecking and harassing a man who had honestly tried to follow the law, the Government found, tha t instead of owing back taxes, this man had actually over paid the Government about \$2,100 and an order was entered up for the Treasury Department to refund him that amount.

Most poeple are honest. Most people are willing to pay their just taxes, but the average man soon were supposed to have been adjusted two or three years before. The trouble with the Federal tax sche dules at the present is that nobody can figure with certainty what the actually mean. It is rare for two auditors to figure the same report and get the same results.

So when Congress comes to con sider the income tax laws at the next session, it is to be hoped that an understandable, workable set of rules and regulations can be worked out in order that any honest man of ordinary intelligence can work out his return and make a settle ment, without being harassed with collectors and auditors for years afterward. This could be done if Congressmen and Senators could ever get th eidea that a man is not necessarily a crook simply because he pays an nicome tax.

ADVERTISING AS A HELP TO LAW

That advertising has long been an important factor in merchandising is well recognized. The man who tries to succeed in busines nowaday without using the newspa per and some other forms of adver tising is rare. Few ever attemp it and those few seldom survive very long. But advertising has been found to be useful in other ways Churches advertise and people who formerly thought their services of their goods so well known as to need no advertising now find it profitable to adopt the methods so successfully employed by the alert business men who have something

But the latest use to which advertising has been put is to combat crime. Chicago, long known as the center of criminal activities, has adopted the new idea. Placards in the street cars, posters on the billboards and advertisements in the the newspapers are being employed to convince the criminally-inclined that crime does not pay.

One ad will picture the law as represented by the policeman who knows how to shoot and shoot straight. Another will tell the number of criminals slain by their confederates or by policeman. Still another will blazon forth the statement that criminals are the poorest paid people on earth, placing empha-

sis upon the fact that seldom does bootlegger, highjacker or safe lower get away with enough mone
